DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to a solid electrolytic capacitor, classified in class 361, subclass 523.
 - II. Claims 15-21, drawn to a method of forming a solid electrolytic capacitor, classified in class 29, subclass 25.03.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed does not require the *step of* ^{-ET} _{1/1/10/03} anodizing the valve metal pellet to form a dielectric oxide on the surface on the valve metal (the dielectric oxide can be formed on the pellet using a dry plating process (i. e. sputtering)); the step of dipping the polymer coated pellet into a paint containing a conductive metal powder (the conductive metal can be formed by a paste method); and repeating the step of forming the second conductive polymer.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Herbert O'Toole on 11/14/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
